Installation

The RIS183\_9T03\_Bedford\_to\_Brighton\_Part\_2.zip file should contain 4 files:

this readme

RIS183\_9T03\_0443\_Bedford\_to\_Brighton\_Part\_2.rwp

RIS183\_9T03\_0443\_Bedford\_to\_Brighton\_Part\_2\_Scenario\_Briefing.pdf

RIS183\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS183\_9T03\_Bedford\_to\_Brighton\_Part\_2.zip file, select the rwp file and click the Open button. This should install the scenario.

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. There is a lot of AI in this scenario and FPS does suffer. I get around 20 FPS from the start up to around East Croydon. Between East Croydon & Preston Park it is between 30 & 40 FPS and then at Brighton it is back down to about 20 FPS. For me it is just on the playable side of things but that might not be the case for everyone.

When I was creating this scenario there were a number of passenger trains sitting in sidings that are supposed to be empty but had passengers sitting inside them. Every time I ran the scenario I thought it looked incredibly unrealistic and there were no versions of the rolling stock that didn't have passengers. Therefore, I created my own versions of the rolling stock in question and used them. It gives a much more sensible view as you pass the items. I have included the changed bin files for the rolling stock in the folder titled Additional Bin Files which also includes instructions on what to place in what folders in your RailWorks\Assets folder. As always, RIS183\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.
