Max Speed: 100 mph
Train Length: 242m (796ft)
Train Weight: 406 tons
Operational Information: Nothing

Scenario Briefing

Good morning driver. Today you are in charge of an early morning Thameslink service from Three Bridges to Bedford. You are currently in Platform 1 at Three Bridges so your first task is to release the doors to allow passengers to board and then get set-up ready to depart at 04:15.

On this leg of your trip you call at Gatwick Airport, East Croydon, Blackfriars, City Thameslink, Farringdon and St Pancras. Between Gatwick Airport and Purley you will be running on the Up Redhill line.

The timings for your service are very generous so you may find yourself with a long wait before your booked departure time once you reach Blackfriars.

You are running on DC power but are booked to change to AC at City Thameslink.

Your train is formed of a 12 car Class 700 set and the maximum permitted speed for your train today is 100 mph.

Weekly/Daily/Special Operating Notices

None

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. All trains are taken from the timetable in operation on the day the scenario is set with adjustments here and there to cater for TSC and gameplay. Additionally, the scenario reflects what happened on that specific day.
