<https://alanthomsonsim.com/downloads/emr-360/>

Other Payware (Optional)

Sky & Weather Enhancement Pack 2.0 - available from Armstrong Powerhouse

https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Installation

The RIS185_9T40_Three_Bridges_to_Bedford_Part_2.zip file should contain 4 files:

this readme

RIS185_9T40_0415_Three_Bridges_to_Bedford_Part_2.rwp

RIS185_9T40_0415_Three_Bridges_to_Bedford_Part_2_Scenario_Briefing.pdf

RIS185_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS185_9T40_Three_Bridges_to_Bedford_Part_2.zip file, select the rwp file and click the Open button. This should install the scenario.

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. There is a lot of AI in this scenario and FPS does suffer. I get around 20 FPS from East Croydon to about Blackfriars. For me it is just on the playable side of things but that might not be the case for everyone.

As always, RIS185_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

Feedback

I always welcome feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://railworks.freeforums.net/thread/1583/anakha-tsc-scenarios>.
