Installation

The RIS189_1M80_Low_Fell_RMT_to_Willesden_PRDC_Part_4.zip file should contain 5 files:

this readme

RIS189_1M80_2143_Low_Fell_RMT_to_Willesden_PRDC_Part_4.rwp

RIS189_1M80_2143_Low_Fell_RMT_to_Willesden_PRDC_Part_4_Scenario_Briefing.pdf

RIS189_Scenery_List.Pdf

RIS189_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS189_1M80_Low_Fell_RMT_to_Willesden_PRDC_Part_4.zip file, select the rwp file and click the Open button. This should install the scenario.

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

The ELAP is listed as optional because I have not used it for any rolling stock but for scenery items only. (See below). RIS189_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

This scenario does include static scenery items which are not be critical in any way to running the scenario. If you don't have the items installed then you should be able to run the scenario but the scenery items will not appear as intended. RIS189_Scenery_List.pdf has details of the paths used for all scenery items used so you can double-check you have the items the scenario requires if you wish.

Feedback

I always welcome feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
