Installation

The RIS192\_3S59\_Wigan\_LIP\_to\_Wigan\_LIP\_Part\_3.zip file should contain 4 files:

this readme

RIS192\_3S59\_1740\_Wigan\_LIP\_to\_Wigan\_LIP\_Part\_3.rwp

RIS192\_3S59\_1740\_Wigan\_LIP\_to\_Wigan\_LIP\_Part\_3\_Scenario\_Briefing.pdf

RIS192\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS192\_3S59\_Wigan\_LIP\_to\_Wigan\_LIP\_Part\_3.zip file, select the rwp file and click the Open button. This should install the scenario.

## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. Realism takes a bit of a hit in this scenario as there is very little static rolling stock in the myriad of sidings on this route. If I attempted to fill up the sidings then the scenario would always crash on loading on my PC. The only way I could reliably get the scenario to load was to drastically reduce the amount of static stock. I'm not sure if that is a problem with this scenario on this route on my PC or a more global problem with the route itself.

Additionally, this scenario does feature a lengthy stop for the player train. If you do not wish to be stationary for an extended period of time I would suggest running the game with the ASYNC keys shortcut active which will allow you to accelerate time in-game.

The MBA wagons are only used as static stock in sidings so could be replaced with any similar bogie box type wagons you currently see on the UK network if you don't have the ones I've used and don't wish to purchase them. Additionally, anyone who does not have the payware IIA Biomass wagons and doesn't want to get them then the freeware version is currently still available at either Fuller Simulations or Alan Thomson Sim. As always, RIS192\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.
