## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. All trains are taken from the timetable in operation on the day the scenario is set with adjustments here and there to cater for TSC and gameplay. Additionally, the scenario reflects what happened on that specific day.

This scenario does feature a lengthy stop for the player train. If you do not wish to be stationary for an extended period of time I would suggest running the game with the ASYNC keys shortcut active which will allow you to accelerate time in-game.
