## Installation

The RIS197\_3Z42\_Derby\_Chaddesden\_Sidings\_to\_Sheffield.zip file should contain 5 files:

this readme

RIS197\_3Z42\_0542\_Derby\_Chaddesden\_Sidings\_to\_Sheffield.rwp

RIS197\_3Z42\_0542\_Derby\_Chaddesden\_Sidings\_to\_Sheffield\_Scenario\_Briefing.pdf

RIS197\_Scenery\_List.Pdf

RIS197\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS197\_3Z42\_Derby\_Chaddesden\_Sidings\_to\_Sheffield.zip file, select the rwp file and click the Open button. This should install the scenario.

## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

\*The Rail Adventure repaints of the Class 43 and the Major Wales Design Class 43 Revamp Pack both require the AP Class 43 (MTU)/Mk3 Enhancement Pack which has been discontinued. If you purchased the pack previously then this scenario should work OK as long as you have the revamp pack & the Rail Adventure repaint installed. The new AP Class 43 (MTU)/Mk3 Enhancement Pack is likely to be replaced in the very near future so, when it is released, I will be revisiting this scenario to establish what impact (if any) the replacement pack has on the scenario running. For example, the previous AP pack installed items to the RailWorks\Assets\Kuju\RailSimulator\RailVehicles\Diesel\HST folder. If the new AP pack also does the same (and overwrites existing items in that folder) then it may break the Rail Adventure repaint and this scenario will not work. However, if the new AP pack installs to the RailWorks\Assets\AP folder and leaves the older items in the Kuju folder as is then this scenario should work as it does at release.\*

This scenario does feature a lengthy stop for the player train. If you do not wish to be stationary for an extended period of time I would suggest running the game with the ASYNC keys shortcut active which will allow you to accelerate time in-game.

RIS197\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.

This scenario does include static scenery items which are not be critical in any way to running the scenario. If you don't have the items installed then you should be able to run the scenario but the scenery items will not appear as intended. RIS197\_Scenery\_List.pdf has details of the paths used for all scenery items used so you can double-check you have the items the scenario requires if you wish.
