Sky & Weather Enhancement Pack 2.0 - available from Armstrong Powerhouse

https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Installation

The RIS165_2U03_Worthing_to_Brighton.zip file should contain 5 files:

this readme

RIS165_2U03_0710_Worthing_to_Brighton.rwp

RIS165_2U03_0710_Worthing_to_Brighton_v2.rwp

RIS165_2U03_0710_Worthing_to_Brighton_Scenario_Briefing.pdf

RIS165_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS165_2U03_Worthing_to_Brighton.zip file, select the rwp file and click the Open button. This should install the scenario.

Notes

There are 2 rwp files in this pack. RIS165_2U03_0710_Worthing_to_Brighton.rwp works on the 0.5 version of The Sussex Lines route only whilst RIS165_2U03_0710_Worthing_to_Brighton_v2.rwp works on The Sussex Lines Phase 2 version of the route.

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

The Class 700 is only used in this scenario as static stock so I have used the default versions that come with the DTG pack and not used any of the versions that come with the AP Class 700 Enhancement pack. As always, RIS165_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

Feedback

I always welcome feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://railworks.freeforums.net/thread/1583/anakha-tsc-scenarios>.
