Installation

The RIS211\_9E19\_Liverpool\_Lime\_Street\_to\_Newcastle\_Part\_1.zip file should contain 4 files:

this readme

RIS211\_9E19\_1924\_Liverpool\_Lime\_Street\_to\_Newcastle\_Part\_1.rwp

RIS211\_9E19\_1924\_Liverpool\_Lime\_Street\_to\_Newcastle\_Part\_1\_Scenario\_Briefing.pdf

RIS211\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS211\_9E19\_Liverpool\_Lime\_Street\_to\_Newcastle\_Part\_1.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3<sup>rd</sup> party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. Additionally, this scenario does feature a lengthy stop for the player train. If you do not wish to be stationary for an extended period of time I would suggest running the game with the ASYNC keys shortcut active which will allow you to accelerate time in-game.

The MBA wagons are only used as static stock in sidings so could be replaced with any similar bogie box type wagons you currently see on the UK network if you don't have the ones I've used and don't wish to purchase them. Additionally, anyone who does not have the payware IIA Biomass wagons and doesn't want to get them then the freeware version is currently still available at either Fuller Simulations or Alan Thomson Sim. As always, RIS211\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.

## Feedback

I always welcome feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
