Train Category: Express Passenger Trains - Express Passenger

Max Speed: 125 mph

Train Length: 130m (427ft)

Train Weight: 224 tons

Operational Information: Nothing

Scenario Briefing

Good evening driver. Today you are in charge of a TPE service from Liverpool to Newcastle. You are currently in platform 15 at Leeds so release your doors to allow passengers to board and get set-up ready to depart as soon as permitted.

Due to passengers causing a disturbance on a train preceding yours at Newton-le-Willows, you are currently running a little over 10 minutes late.

On this leg of your journey you have a station stop at York only. You have arrived here at Leeds running on diesel power and will remain on diesel power for the next leg to York.

Your train is formed of a 5 car Class 802 set and the maximum permitted speed for your train is 125 mph.

Timetable

	Schedule			
Location	Arrival	Pass	Departure	Platform/Line
Leeds 2½ min pathing allowance	---	---	20:52	15/DM
Neville Hill West Jnc	---	20:54½	---	DHM
Cross Gates	---	20:57	---	DH/1
Garforth	---	20:59½	---	
Micklefield	---	21:00½	---	1/DL

DH - Down Hull
DL - Down Leeds

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. All trains are taken from the timetable in operation on the day the scenario is set with adjustments here and there to cater for TSC and gameplay. Additionally, the scenario reflects what happened on that specific day.
