Installation

The RIS221\_OC53\_Exeter\_Riverside\_to\_St\_Blazey\_Part\_1.zip file should contain 4 files:

this readme

RIS221\_OC53\_1851\_Exeter\_Riverside\_North\_Yard\_to\_St\_Blazey\_Sorting\_Sidings\_Part\_1.rwp  
RIS221\_OC53\_1851\_Exeter\_Riverside\_North\_Yard\_to\_St\_Blazey\_Sorting\_Sidings\_Part\_1\_Scenario\_Briefing.pdf  
RIS221\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS221\_OC53\_Exeter\_Riverside\_to\_St\_Blazey\_Part\_1.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3<sup>rd</sup> party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. I originally intended to release this scenario for the BHBP v4.1 route but I get very low FPS when using that version of the route which makes the scenario unplayable. If the FPS improves in any future release I'll revisit the scenario for that route.

I have used the JNA wagons from 3DZug because I purchased that pack when it was released. Since then Armstrong Powerhouse have released their JNA-T Wagon Pack. However, I'm not planning on getting the AP pack as it duplicates what I already have. If you have the AP pack rather than the 3DZug one then you could do a wagon swap and getting basically the same wagons as the ones I've used. Similarly, the HTA wagons from TSRollingStock could be replaced with anything similar such as the ones that come with the ELAP. The Digital Traction Modern Wagon Pack 1 is used because the JIA wagons in the pack are the only ones I could find that represent the ones used on current (2025) trains that operate to/from St Blazey.

I have used the Wessex Main Line Extension from Just Trains for the revamped Kuju Class 165/166 that comes with that route. If you don't have the route then there are GWR Green reskins available (search for superalbs) for the Kuju model that will give you the same thing. As always, RIS221\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.
