## Installation

The RIS227\_2D21\_Middlesbrough\_to\_Bishop\_Auckland.zip file should contain 4 files:

this readme

RIS227\_2D21\_1824\_Middlesbrough\_to\_Bishop\_Auckland.rwp

RIS227\_2D21\_1824\_Middlesbrough\_to\_Bishop\_Auckland\_Scenario\_Briefing.pdf

RIS227\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS227\_2D21\_Middlesbrough\_to\_Bishop\_Auckland.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3<sup>rd</sup> party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

The AP Class 142 and items from the ELAP are used to represent stock located outdoors at Locomotion in Shildon. The other freight wagons are mainly used as static stock to represent what you would expect to see sitting in sidings at Tees Yard so could be replaced with any wagons you might see sitting in sidings on the current UK network if you don't have/don't wish to get the items I've used. As always, RIS227\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.

## Feedback

I always welcome feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
