## Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

The freight wagons I've used are those that might be seen in the sidings at Guide Bridge so can be replaced with any wagons you see on the current UK network if you don't have the items I've used. As always, RIS228\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.

This scenario does include static scenery items which are not be critical in any way to running the scenario. If you don't have the items installed then you should be able to run the scenario but the scenery items will not appear as intended. RIS228\_Scenery\_List.pdf has details of the paths used for all scenery items used so you can double-check you have the items the scenario requires if you wish.
