Scenario Briefing

Good evening driver. Today you are in charge of a TPE service from Manchester to Middlesbrough. Having left Manchester a while ago you are now in Platform 8 at Huddersfield where you have a station stop so release your doors to allow passengers to board and get set-up ready to depart as soon as permitted.

On this leg of your journey you have a station stop at Leeds only.

Your train is formed of a 3 car Class 185 set and the maximum permitted speed for your train is 100 mph.

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. All trains are taken from the timetable in operation on the day the scenario is set with adjustments here and there to cater for TSC and gameplay. Additionally, the scenario reflects what happened on that specific day.

This scenario is not set-up for the announcements system on the ATS Class 185. As far as I can see the DTG Huddersfield Line: Manchester - Leeds route is not one that is included in the available options for the announcements system. If anyone checks out the ATS Class 185 Announcement guide and finds a route code for the Huddersfield route then let me know and I will update the scenario accordingly.
