<https://rail-sim.de/forum/filebase/entry/10082-replacement-sound-rsslo-voith-maxima-40-cc-version-2/>

Other Payware (Optional)

Sky & Weather Enhancement Pack 2.0 - available from Armstrong Powerhouse

https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Installation

The RIS236_SGL59384_Hof_to_Kronach_Part_2.zip file should contain 4 files:

this readme

RIS236_SGL59384_0606_Hof_to_Kronach_Part_2.rwp

RIS236_SGL59384_0606_Hof_to_Kronach_Part_2_Scenario_Briefing.pdf

RIS236_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install but-

ton on the right hand side, navigate to the location where you unzipped the RIS236_SGL59384_Hof_to_Kronach_Part_2.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

I have used the vR Ealos-t 058 wagons for the player train as they are particular favourite of mine,. There are any number of German freight wagons that can be used to haul logs so the wagons I've used can easily be replaced if you don't have the Ealos ones - you would just need to be careful about the length of the wagons you are using for your replacement. As always, RIS236_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

Feedback

I always welcome feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://railworks.freeforums.net/thread/1583/anakha-tsc-scenarios>.
