Installation

The RIS251_9M06_Newcastle_to_Liverpool_Lime_Street_Part_4.zip file should contain 4 files:

this readme

RIS251_9M06_0606_Newcastle_to_Liverpool_Lime_Street_Part_4.rwp

RIS251_9M06_0606_Newcastle_to_Liverpool_Lime_Street_Part_4_Scenario_Briefing.pdf

RIS251_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS251_9M06_Newcastle_to_Liverpool_Lime_Street_Part_4.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Free-ware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

We are missing some of the rolling stock you'd expect to see in this scenario such as the Class 195, Class 197 & Class 331 so substitutions have to do. Additionally, I've included both Volume 1 and Volume 2 of the AP Class 66 Enhancement Pack 2.0 as requirements but really only Volume 1 is needed as that has enough livery options to cover the usage of any Class 66. I include Volume 2 only in case I inadvertently use a livery that is only available in Volume 2. As always, RIS251_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
