https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Other Freeware (Optional)

UKTS Freeware Pack - Clutter #1 - available from Rail-Sim.de

<https://rail-sim.de/forum/filebase/entry/8235-ukts-freeware-pack-clutter-1>

Installation

The RIS252_1D10_Paddington_to_Oxford.zip file should contain 1 folder and 5 files:

this readme

RIS252_1D10_0522_Paddington_to_Oxford.rwp

RIS252_1D10_0522_Paddington_to_Oxford_Scenario_Briefing.pdf

RIS252_Scenery_List.pdf

RIS252_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install but-

ton on the right hand side, navigate to the location where you unzipped the RIS252_1D10_Paddington_to_Oxford.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

I've included both Volume 1 and Volume 2 of the AP Class 66 Enhancement Pack 2.0 as requirements but really only Volume 1 is needed as that has enough livery options to cover the usage of any Class 66. I include Volume 2 only in case I inadvertently use a livery that is only available in Volume 2. As always, RIS252_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

This scenario does include static scenery items which are not be critical in any way to running the scenario. If you don't have the items installed then you should be able to run the scenario but the scenery items will not appear as intended. RIS252_Scenery_List.pdf has details of the paths used for all scenery items used so you can double-check you have the items the scenario requires if you wish.

Please Note: The scenery item I've used - a modern yard spotlight tower from the UKTS Clutter Pack - is not, by default, set-up to be used in scenarios. A simple change to the relevant bin file of the item makes it useable in scenarios & I've made that change in my copy of the bin file. However, I do not know if the scenery item will work for anyone else if they have the original bin file & not the revised one I have. Therefore, I have included a copy of my revised version of the bin file in a folder called Amended Bin File with instructions on where to place the amended file.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
