Scenario Briefing

Good evening driver. Today you have been rostered onto the Harwich Town branch line service and you are going to be operating 2A54 the final passenger service of the day from Colchester to Harwich Town. You are currently in platform 1 at Colchester so release your doors for passengers to board and then get set-up ready to depart as soon as permitted.

Once underway you have station stops at Manningtree, Mistley, Wrabness, Harwich International, Dovercourt and Harwich Town.

Your train is formed of a 4 car Class 755 set and the maximum permitted speed for your train is 100 mph.

Notes

In reality this service is operated by a Class 720. As we don't have a Class 720 available for TSC a Class 755 substitutes which (I think) isn't beyond the realms of possibility.

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. All trains are taken from the timetable in operation on the day the scenario is set with adjustments here and there to cater for TSC and gameplay. Additionally, the scenario reflects what happened on that specific day.
