Sky & Weather Enhancement Pack 2.0 - available from Armstrong Powerhouse

https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Other Freeware (Optional)

UKTS Freeware Pack - Clutter #1 - available from Rail-Sim.de

<https://rail-sim.de/forum/filebase/entry/8235-ukts-freeware-pack-clutter-1/>

Installation

The RIS257_3Y80_Heaton_T&RSMD_to_Middlesbrough.zip file should contain 1 folder and 5 files:

this readme

Amended Bin File folder

RIS257_3Y80_0435_Heaton_T&RSMD_to_Middlesbrough.rwp

RIS257_3Y80_0435_Heaton_T&RSMD_to_Middlesbrough_Scenario_Briefing.pdf

RIS257_Scenery_List.pdf

RIS257_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS257_3Y80_Heaton_T&RSMD_to_Middlesbrough.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. This scenario does feature a lengthy stop for the player train. If you do not wish to be stationary for an extended period of time I would suggest running the game with the ASYNC keys shortcut active which will allow you to accelerate time in-game.

The Cargowaggon Flat IGA wagons are used for a train conveying a steel load so could be replaced with wagons that carry a steel load such as the BAA/BZA Wagon Pack from Armstrong Powerhouse or the wagons that come in the Yard Filler Pack - Volume 1 from TSRollingStock. As always, RIS257_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS_Tools or LocoSwap.

This scenario does include static scenery items which are not be critical in any way to running the scenario. If you don't have the items installed then you should be able to run the scenario but the scenery items will not appear as intended. RIS257_Scenery_List.pdf has details of the paths used for all scenery items used so you can double-check you have the items the scenario requires if you wish.

Please Note: The scenery item I've used - a modern yard spotlight tower from the UKTS Clutter Pack - is not, by default, set-up to be used in scenarios. A simple change to the relevant bin file of the item makes it useable in scenarios & I've made that change in my copy of the bin file. However, I do not know if the scenery item will work for anyone else if they have the original bin file & not the revised one I have. Therefore, I have included a copy of my revised version of the bin file in a folder called Amended Bin File with instructions on where to place the amended file.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
