Installation

The RIS260\_1Y80\_Middlesbrough\_to\_Kings\_Cross\_Part\_3.zip file should contain 4 files:

this readme

RIS260\_1Y80\_0708\_Middlesbrough\_to\_Kings\_Cross\_Part\_3.rwp

RIS260\_1Y80\_0708\_Middlesbrough\_to\_Kings\_Cross\_Part\_3\_Scenario\_Briefing.pdf

RIS260\_Stock\_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen followed by the Refresh button on the right hand side. Once the refresh is complete, click the Install button on the right hand side, navigate to the location where you unzipped the RIS260\_1Y80\_Middlesbrough\_to\_Kings\_Cross\_Part\_3.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3<sup>rd</sup> party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

I have used the JNA wagons from 3Dzug as I purchased them before AP released their version & I've no plans to buy the same wagons twice. If you don't have the 3DZug version (and don't wish to get it) then they can be replaced with any similar bogie box type wagons. As always, RIS260\_Stock\_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires but everything is easily swappable in either TS\_Tools or LocoSwap.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://railworks.freeforums.net/thread/1583/anakha-tsc-scenarios>.
