Scenario Briefing

Good morning driver. The Porsche factory at Leipzig generates a lot of rail traffic with new cars being moved to a wide range of destinations. Today you've been rostered on to a service taking brand new cars to Bremerhaven ready for export.

Having left Leipzig a while ago you've reached Rannstadt West where you've had a booked stop. Once underway you'll be going as far as Biederitz where you have another booked stop.

Your motive power is 2 x BR185.

The maximum permitted speed for your train is 100kph.

Notes

Although I generally get good framerates on this route I do get frequent micro-stutters when the frame rate drops into the teens and framerates do suffer badly around Rannstadt but pick up as you leave that area.
