Installation

The RIS274_2C67_Cardiff_Central_to_Plymouth_Part_3.zip file should contain 4 files:

this readme

RIS274_2C67_0800_Cardiff_Central_to_Plymouth_Part_3.rwp

RIS274_2C67_0800_Cardiff_Central_to_Plymouth_Part_3_Scenario_Briefing.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen, followed by the Refresh button on the right-hand side. Once the refresh is complete, click the Install button on the right-hand side, navigate to the location where you unzipped the RIS274_2C67_Cardiff_Central_to_Plymouth_Part_3.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

All the freight wagons in this scenario are used as static stock in sidings, so could be replaced with any wagons you currently see on the UK network if you don't have what I've used and don't wish to get it/them. Additionally, the Class 08 locos are used as static depot stock so you can use any 08 you have available if you don't want to use the Major Wales Design pack. As always, RIS274_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires, but everything is easily swappable in either TS_Tools or LocoSwap.
