Installation

The RIS280_DB69781_Veitshochheim_to_Hoch_Merzburg_Gbf.zip file should contain 6 files:
this readme

RIS280_DB69781_0650_Veitshochheim_to_Hoch_Merzburg_Gbf.rwp

RIS280_DB69781_0650_Veitshochheim_to_Hoch_Merzburg_Gbf_Scenario_Briefing_DE.pdf

RIS280_DB69781_0650_Veitshochheim_to_Hoch_Merzburg_Gbf_Scenario_Briefing_EN.pdf

RIS280_Scenery_List.pdf

RIS280_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen, followed by the Refresh button on the right-hand side. Once the refresh is complete, click the Install button on the right-hand side, navigate to the location where you unzipped the RIS280_DB69781_Veitshochheim_to_Hoch_Merzburg_Gbf.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

There is a compromise with this scenario. I've used the NS Slmmnps wagons from Chris Trains but the pack is based on the Royal Netherlands Army so, for example, the Howitzer and Tank have NLD on the side which isn't accurate for a scenario portraying the equipment of the Bundeswehr. There are other military wagons packs available but the Chris Trains pack was the only one that allowed me to place the Howitzer and Tank as separate scenery items.

I have used a number of payware packs for freight wagons but the majority of them can be replaced with items from the 3DZug Verkehrspack Güterwagen pack if you don't have the items I've used. RIS280_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires, but everything is easily swappable in either TS_Tools or LocoSwap.

This scenario does include static scenery items, which are not critical in any way to running the scenario. If you don't have the items installed then you should be able to run the scenario, but the scenery items will not appear as intended. RIS280_Scenery_List.pdf has details of the paths used for all scenery items used so you can check you have the items the scenario requires if you wish.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://railworks.freeforums.net/thread/1583/anakha-tsc-scenarios>.
