https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Other Freeware (Optional)

Installation

The RIS289_3A81_Laira_TRSMD_to_Newton_Abbot.zip file should contain 5 files:

this readme

RIS289_3A81_0933_Laira_TRSMD_to_Newton_Abbot.rwp

RIS289_3A81_0933_Laira_TRSMD_to_Newton_Abbot_Scenario_Briefing.pdf

RIS289_Scenery_List.pdf

RIS289_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen, followed by the Refresh button on the right-hand side. Once the refresh is complete, click the Install button on the right-hand side, navigate to the location where you unzipped the RIS289_3A81_Laira_TRSMD_to_Newton_Abbot.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at [3rd Party/Freeware Installation Guide](#).

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended. The scenario also features a lengthy stop for the player train. If you do not wish to be stationary for an extended period of time I would suggest running the game with the ASYNC keys shortcut active which will allow you to accelerate time in-game.

The Class 08 locomotives and the HST/Mark 3 Coaches are only used as static stock in this scenario so could be replaced with anything similar if you don't have what I've used and don't wish to get it/them. As always, RIS289_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires, but everything is easily swappable in either TS_Tools or LocoSwap.

This scenario does include static scenery items, which are not critical in any way to running the scenario. If you don't have the items installed, then you should be able to run the scenario, but the scenery items will not appear as intended. RIS289_Scenery_List.pdf has details of the paths used for all scenery items used so you can check you have the items the scenario requires if you wish.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at <https://anakhastscenarios.com> or on the Anakha's TSC Scenarios thread at the Railworks Forum at <https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios>.
