Sky & Weather Enhancement Pack 2.0 - available from Armstrong Powerhouse
https://www.armstrongpowerhouse.com/enhancements/general/sky_weather_enhancement_pack_2.0

Installation

The RIS293_1A81_Newton_Abbot_to_Paddington_Part_4.zip file should contain 4 files:
this readme
RIS293_1A81_1055_Newton_Abbot_to_Paddington_Part_4.rwp
RIS293_1A81_1055_Newton_Abbot_to_Paddington_Part_4_Scenario_Briefing.pdf
RIS293_Stock_List.pdf

To install the rwp file, run the Train Simulator Utilities program from your Steam\SteamApps\common\RailWorks\ folder. Once the Utilities program is running, click the package manager tab at the top of the screen, followed by the Refresh button on the right-hand side. Once the refresh is complete, click the Install button on the right-hand side, navigate to the location where you unzipped the RIS293_1A81_Newton_Abbot_to_Paddington_Part_4.zip file, select the rwp file and click the Open button. This should install the scenario. More details on installing 3rd party content in TSC can be found at 3rd Party/Freeware Installation Guide.

Notes

This scenario has been built around the player adhering to the given maximum speed and following the given schedule. Without those elements, the scenario may not play as intended.

All the freight wagons in this scenario are used as static stock in sidings, so could be replaced with any wagons you currently see on the UK network if you don't have what I've used and don't wish to get it/them. Additionally, the Mark 1 & Mark 2 coaches and the Class 47 locomotives represent WCRC rolling stock that is static in scenarios so, again, can be replaced with anything similar. As always, RIS293_Stock_List.pdf has details of the paths used for all rolling stock so you can double-check to ensure you have the items the scenario requires, but everything is easily swappable in either TS_Tools or LocoSwap.

Feedback

I always welcome constructive feedback so if you have any questions or constructive feedback on this scenario then you can leave a comment either on the download page for the scenario itself at https://anakhastscscenarios.com or on the Anakha's TSC Scenarios thread at the Railworks Forum at https://rail-works.freeforums.net/thread/1583/anakha-tsc-scenarios.
